M AHMED ASIF

Full-Stack & AI Developer

ahmedaanasif@gmail.com • +92 321 9555501 • Rawalpindi, Pakistan

PROFESSIONAL SUMMARY

Innovative Full-Stack Developer with expertise in building scalable web applications, AI/ML integration, and data analytics solutions. Proven track record of delivering high-performance systems serving 100K+ active users while maintaining optimal infrastructure efficiency. Specialized in deep learning applications including **Computer Vision (CycleGAN)**, **NLP with Transformers** for machine translation, and **IoT voice-controlled automation systems**. Passionate about turning complex problems into elegant digital solutions through modern technologies including React, Node.js, Python, TensorFlow, and cloud platforms. Experienced in leading development teams and mentoring junior developers to enhance code quality and system architecture.

EDUCATION

Bachelor of Science in Computer Science
Graduated 2026

FAST University Islamabad

Islamabad, Pakistan

- Final Year Project: **VoiceBot** - Offline voice-controlled home automation system demonstrating exceptional technical skills and innovation
- Focused on **Full-Stack Development, AI/ML, and Data Science**

PROFESSIONAL EXPERIENCE

Lead Web Developer
May 2025 – Present

Anime Anyway

Remote

- Sustained **Supabase and Hostinger infrastructure** under heavy traffic (**100K+ active users, 1.5M+ total views**) while maintaining strong performance on a low-tier setup
- Led development and optimization of the platform to ensure **reliable content delivery** and smooth user experience for a large fan-driven audience
- Implemented custom line-by-line comment system and Discord API integration for efficient content moderation

React | Supabase | Hostinger | Tailwind CSS | Performance Optimization

Technical Lead
May 2025 – Present

Aba Virtual

Remote

- Led **full-stack development** of an educational platform from concept to deployment for children with special needs
- Implemented **interactive educational features** using PhaserJS game engine tailored for special needs students
- Optimized system performance and integrated **Google Auth and PayPal API** for secure authentication and payment processing

React | Node.js | PhaserJS | Sanity CMS | Google Auth | PayPal API

Full-Stack Developer Intern
Dec 2024 – Feb 2025

Codesloop

Remote

- Engineered and optimized **full-stack solutions** to improve performance and scalability using React, Node.js, and MongoDB
- Built a **record and revenue tracking system** for Iqra Driving School with drag-and-drop class scheduling, streamlining operations and financial management
- Collaborated cross-functionally and assumed additional responsibilities to drive project success

React | Node.js | MongoDB | Redux | Express

Full-Stack & Desktop Application Developer

June 2024 – Jan 2025

PyBugs Technologies & BPO

Saddar, Rawalpindi

- Developed and maintained **multiple management systems** to streamline business operations and improve workflow efficiency
- Improved **backend performance and database efficiency** through system optimization and scalable architecture design
- Contributed to architecture design and **mentored junior developers** to enhance code quality and team productivity

.NET Framework | MySQL | WordPress | React | Node.js | Express

FEATURED PROJECTS

VoiceBot: Offline Voice-Controlled Home Automation

IoT • Voice AI • Automation | 6 Months

- Developed an **offline voice-controlled home automation system** with privacy-first design and optional remote access
- Implemented **Natural Language Processing (NLP)** for accurate voice command recognition without cloud dependencies
- Designed multi-user access system supporting various automation scenarios

Python | Voice Processing | NLP | Home Automation

View on GitHub

Iqra Driving School Management Platform

Full-Stack • Business Management | Ongoing

- Comprehensive driving school management system with **dual interfaces** for Admins and Managers
- Features include student registration, instructor/vehicle/branch management, **payment tracking, and attendance marking**
- Implemented **drag-and-drop class scheduling** for intuitive calendar management

React | Node.js | Express | MongoDB | Redux | Tailwind CSS

View on GitHub

CycleGAN Implementation for Person Face Sketches

Computer Vision • Deep Learning

- Implements **CycleGAN by Jun-Yan Zhu** using the Person Face Sketches dataset from Kaggle to perform **bidirectional face–sketch translation**
- End-to-end training with unpaired image-to-image translation using cycle consistency loss
- Built **Flask-based UI** for real-time face-to-sketch and sketch-to-face conversion

CycleGAN | Flask | TensorFlow | Computer Vision | Python

Machine Translation using Transformers

NLP • Deep Learning

- A **deep learning model** that translates English text into Urdu using a **Transformer-based architecture**
- Implemented attention mechanisms and positional encoding for sequence-to-sequence translation
- Deployed with Flask backend enabling real-time translation with **CUDA acceleration** for faster inference

Transformers | Flask | TensorFlow | CUDA | NLP

TECHNICAL SKILLS

Frontend Development

Next.js, React, TypeScript, Tailwind CSS, HTML5, CSS3, JavaScript ES6+

Backend Development

Node.js, Express, .NET Framework, RESTful APIs, PostgreSQL, MySQL, Firebase, MongoDB

AI/ML & Data Science

Python, YOLOv8, Computer Vision, TensorFlow, Data Analytics, Data Visualization, Data Mining

DevOps & Tools

Git, GitHub, Vercel, Netlify, Supabase, Hostinger, WordPress, CI/CD, Sanity CMS
